

- Has the client ever been tested for HIV?
- If yes, what was the most recent result?
- Documented results are preferred, but reported results are acceptable.

Follow Flow chart for:

Risk Assessment

Most recent HIV test result: **Last Negative or Never tested**

Testing algorithm

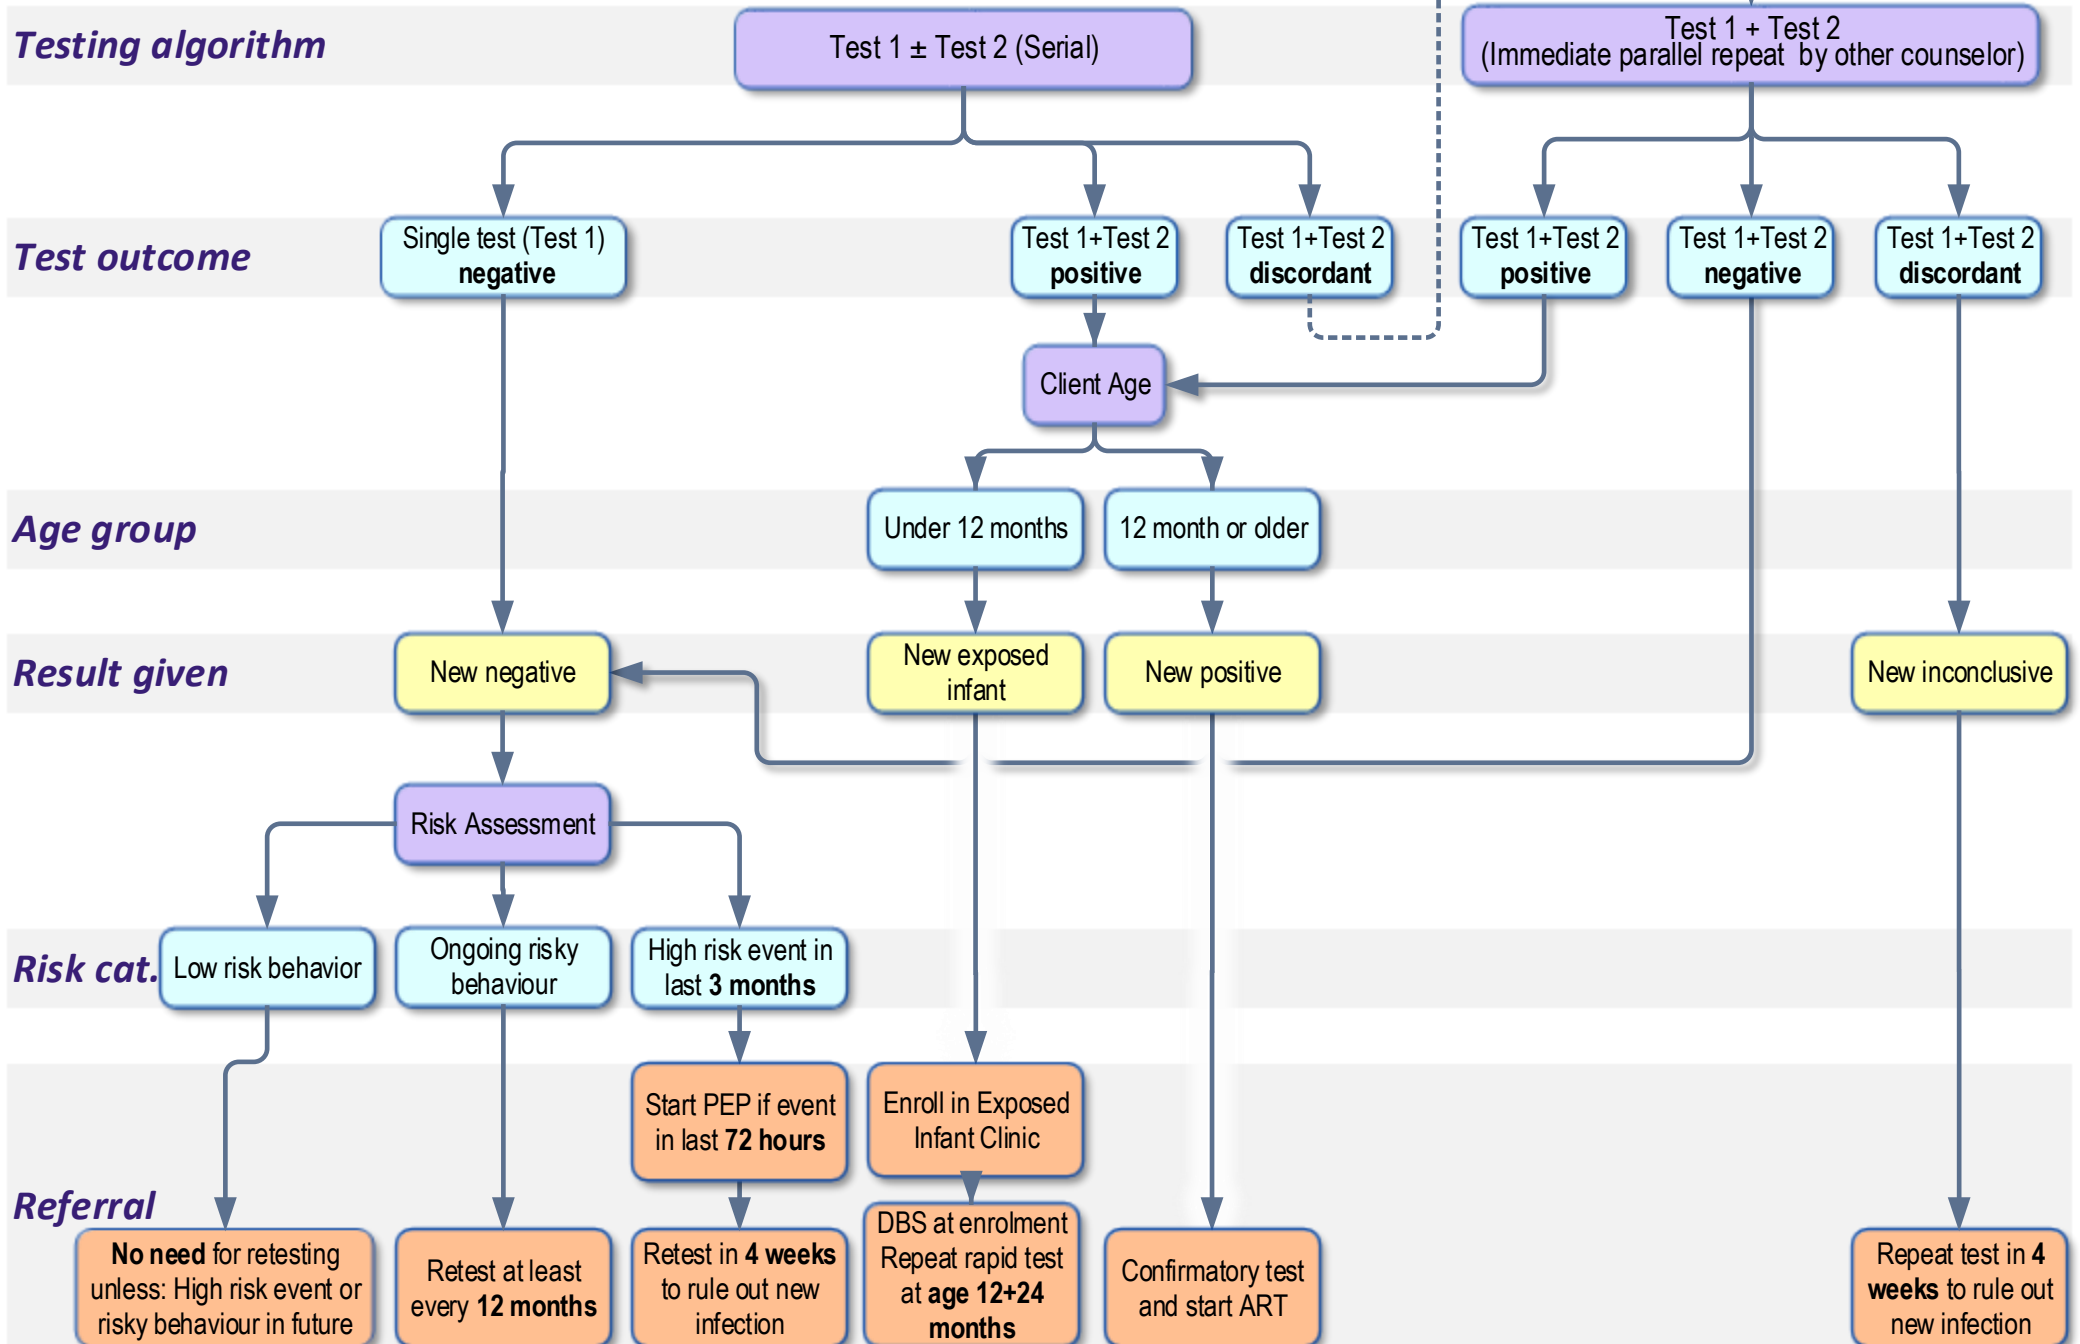

Test outcome

Age group

Result given

Risk cat.

Referral

Most recent HIV test result: **Last Positive**

Testing algorithm

Test 1 + 2 (Parallel confirmatory)

Test 1 + Test 2
(Immed. parallel repeat by other counselor)

Test outcome

Test 1 + Test 2
positive

Test 1 + Test 2
negative

Test 1 + Test 2
discordant

Test 1+Test 2
positive

Test 1+Test 2
negative

Test 1+Test 2
discordant

Client Age

Age group

Under 12 months

12 -23 months

2 years +

Result given

New exposed infant

Confirmatory
(antibody) positive

Confirmatory
positive

Confirmatory
inconclusive
